Fleet Interface Activation

Adjustment of Privacy Settings for all SEAT & CUPRA vehicles

Thank you for using our service „Fleet Interface“. In order to activate data transmission into your company internal fleet management systems, privacy settings need to be adjusted manually in your vehicles` HMI to complete the fleet-in process. This document provides a step-by-step guide for the service setup to initiate the data flow.

Please make sure to follow the steps as described:

1. Confirm vehicle delivery in FleetCom.
2. Register vehicle for the service “Fleet Interface” via the system API (please find more information in our development guide chapter 4 “Use Cases”, sub chapter 4.2 “Vehicle Registration”) in our customer portal.
3. Check vehicle registration within Fleet Interface via the end point “Vehicle Registration” (please find more information in our development guide chapter 4 “Use Cases”, sub chapter 4.2 “Vehicle Registration”) in our customer portal.
4. After completed registration: manual selection of privacy settings “Share vehicle Location” in vehicle HMI as described on the following pages.

Important Notice:

Please register your vehicles first via the Fleet Interface and check the actual registration status before selecting the Privacy Settings in the respective vehicle HMI manually.
